Page Speed Analysis

Website Load Speed

Your page loads slowly.

Page load speed is critical to ensuring good user experience and is becoming a more important ranking factor. Load speed can be impacted by a multitude of factors however and may need technical resources to investigate.

Server Response

All Page Content Loaded

All Page Scripts Complete

Page Load Speed refers to the amount of time it takes to entirely load a webpage in a user's browser. Load speed is complex and can be impacted by a multitude of factors including network, web server, page size, technology, database or coding problems, and may require the help of a developer or systems administrator to troubleshoot. Page Load Speed impacts a user's experience on a website and can directly impact bounce rate and conversions. Additionally, Search Engines are making Page Load Speed a ranking factor.

Optimize Page Load Speed by examining common problem points such as overall file size, server resources or coding problems.

On Page SEO Problem

On-Page SEO Results

Your On-Page SEO is good

Your page is mostly optimized for On-Page SEO performance. On-Page SEO is important to ensure Search Engines can understand your content appropriately and help it rank for relevant keywords. You can continue to improve your page by ensuring HTML Tag Content is completed correctly and text content is well aligned with chosen keywords.

Title Tag

You have a Title Tag, but ideally it should be shortened to between 50 and 60 characters (including spaces).

On-Page Link Structure

We found 46 total links. 7% of your links are external links and are sending authority to other sites. 7% of your links are nofollow links, meaning authority is not being passed to those destination pages.
